Website: riccardo.martinello.dev

Location: Vicenza, Italy

Can relocate to: Padua, Verona, Brescia, Milano, Modena

I'm a 23 years old computer science student based in Vicenza, Italy. I enjoy creating things that live on the internet, whether that be websites, applications, or anything in between. Skilled in Front-end Development. I have 5+ years of experience in HTML, CSS, C, C++, Bootstrap, Three.js. Hence, I have successfully completed several web projects from scratch. Yet, I learn continuously and never stop exploring new technologies.

Skills

I already know

HTML5 4/5   CSS 4/5   C 4/5   C++ 4/5   php 3/5   Bootstrap 4/5

Three.js 2/5   JS 3/5   TypeScript 2/5   React.js 3/5   Astro 3/5

Tailwind CSS 2/5   PostgreSQL 3/5

I want to learn

pnpm   Node.js   NextJS   Electron

Software I use

Blender 3/5   photoshop 3/5   Unity 3/5

Tools I use

Windows   macOS   Linux   Visual Studio Code   git   XAMPP

I speak

Italian native   English C1

Projects

SnoutSpace   August 2024 - now

SnoutSpace is a social networking platform where users can create profiles, share photos, and engage with content from other users, similar to popular platforms like Instagram and DeviantArt. Whether you're an artist showcasing your latest work, a photographer sharing your favorite shots, or just someone looking to connect with others, SnoutSpace provides a fun and interactive space to express yourself.

Link: https://snoutspace.vercel.app/

Repository: https://github.com/IsThisDemi/snoutspace

Technologies: React.js, Tailwind CSS, TypeScript, Appwrite

PowsUp   September 2023 - now

PowsUp! is an Italian group for the organization and creation of Furry events in Lazio and Central Italy. My role in the group is to manage the website and the general IT infrastructure in collaboration with other three developers. We are actively developing a blog to post future events, it's still a work in progress but the main employed tecnologies are Astro and Sanity.

Link: https://powsup.net/

Repository: https://github.com/PowsUp/website

Technologies: Astro, Contentful, Tailwind CSS, pnpm, ESLint, Prettier

---

WhiskerWatcher   January 2024 - July 2024

Object-Oriented Programming University Project. The main objective was making a sensors application using C++ and Qt.

Repository: https://github.com/IsThisDemi/WhiskerWatcher

Technologies: C++, Qt

FitnessCenter   May 2023 - September 2023

WebTec University Project. The main objective was making a website using only plain HTML and CSS being full WCAG 2.1 Compatible, and using PHP to connect and manage data in a database.

Repository: https://github.com/IsThisDemi/FitnessCenter

Technologies: HTML5, CSS, php, JS

Svelasca   July 2023 - August 2023

Database University Project. The main objective was designing, creating, and filling a database in PostgreSQL for a fictional company respecting the given parameters, and show some queries using the PostgreSQL library in C++.

Repository: https://github.com/IsThisDemi/progetto-basi-di-dati

Technologies: PostgreSQL, C++

Oziverse
November 2018 - September 2020

Oziverse was a massive project, it was a social platform where people could build, share and play their own games. It had an active community and reached a peak of 60+ monthly active users.

Team size: 20 person

My role: Founder, Front-end Developer, Back-end Developer, Game Developer, Moderator

Company: None

Category: Website, Video Game, Forum

Technologies: HTML5, CSS, Bootstrap, php, JS, Three.js, Unity

Education
